

Bio-Age Erase

The only one of its kind on the market today. A highly potent combination of marine collagen AND high dose liposomal Vitamin C with silica for collagen absorbency. This formula supports the entire collagen matrix – envision collagen as bricks and the vitamin c as the cement holding it together. Both are required to properly address aging and the degradation of the skin's collagen matrix. The body's Collagen matrix also supports bone, joints, gut, and other tissues. Fight free radical damage from the inside out because you don't only age on your skin! No sweeteners or flavors are added – the natural taste of the vitamin c will be slightly sour and is easily consumed in water or juice. Also offers incredible immune system support year around.

Marine Collagen

- **Enhances skin firmness and elasticity:** Marine collagen helps support the structural matrix of the skin. Over time, this can result in visibly firmer skin, reduced sagging, and improved resilience.
- **Reduces fine lines and supports smoother texture:** By replenishing collagen levels that decline with age, this ingredient helps soften the appearance of wrinkles and promotes a smoother, more youthful-looking complexion.
- **Strengthens hair from the root:** Marine collagen provides essential amino acids like proline and glycine, which support the hair follicle and encourage healthier, stronger, and less brittle hair.
- **Supports joint comfort and flexibility:** Collagen peptides help cushion joints and support cartilage integrity, contributing to overall mobility and comfort.

Liposomal Vitamin C

- **Stimulates natural collagen production:** Vitamin C is a mandatory cofactor in collagen synthesis. With sufficient vitamin C levels, the body can produce stronger, more stable collagen fibers—maximizing the effects of your marine collagen supplement.
- **Protects skin from environmental damage:** As a potent antioxidant, liposomal vitamin C defends the skin from free radicals caused by UV exposure, pollution, and stress. This helps maintain an even skin tone and reduces long-term damage.
- **Brightens dull skin:** Vitamin C helps reduce the appearance of dark spots and supports a more luminous, glowing complexion.
- **Supports immune resilience:** With superior absorption, liposomal vitamin C contributes to strong immune defense and overall health without the digestive discomfort often associated with high-dose traditional vitamin C.
- **Promotes cellular regeneration:** By supporting tissue repair, vitamin C assists the body in maintaining youthful, vibrant-looking skin while enhancing recovery at the cellular level.

Horsetail Extract (7% Silica)

- **Strengthens hair and improves growth quality:** Silica supports the creation of stronger, more flexible hair strands. Over time, this can result in increased shine, reduced breakage, and improved overall hair thickness.
- **Improves skin firmness and elasticity:** Silica plays a role in maintaining the structure of collagen and elastin fibers. This contributes to firmer, smoother, and more resilient skin.
- **Supports strong, healthy nails:** Silica enhances keratin formation, leading to nails that are less prone to breaking, peeling, and bending.

- **Contributes to bone and connective tissue strength:** silica supports the mineralization process in bones and reinforces ligaments, tendons, and other connective tissues for long-term structural health.
- **Provides gentle detoxification support:** Horsetail has natural diuretic properties that help reduce bloating and support the body's detox pathways, contributing to an overall sense of wellness and balance.

Supplement Facts

Serving Size : 1 scoop (3.5g)
Serving per container: 90

Amount Per Serving	% Daily Value
Marine Collagen	500 mg
Liposomal Vitamin C	2000 mg
Horsetail Extract (7% Silica)	100 mg
Other Ingredients: None	

Dosage

- **Suggested use:** As a dietary supplement, take 1 scoop 3 times per day mixed with purified spring water or fresh-pressed juice. Do not take with tap water. Begin with one scoop twice daily and work your way up to 3. If diarrhea occurs, reduce the dose, as you have reached bowel tolerance.
