

Hepatic Glutathione Pathway

Hepatic Glutathione Pathway & Methylation Pathway Regulation for adults and children with attention issues, neurological, behavioral, and memory disorders, and an inhibited detoxification pathway. These individuals cannot break down and excrete toxins properly due to a blockage in the HGP.

Our formula supports glutathione-mediated detoxification pathways that may be compromised by vaccination and/or toxins. Glutathione synthesis in the brain is dependent on hepatic cysteine synthesis and export; AKA, removal of metals from the brain is reliant on the proper functioning of this pathway.

Glutathione is a powerful antioxidant and a critical component of detoxification in the liver. This pathway plays a central role in maintaining cellular health and overall metabolic balance. Key benefits include:

Enhanced Detoxification

- **Phase II Detoxification:** Glutathione helps the liver neutralize and eliminate toxins, heavy metals, and harmful chemicals by binding to them and making them water-soluble for excretion.
- Protects against oxidative stress caused by free radicals and environmental toxins.

Reduced Oxidative Stress

- Glutathione is a potent antioxidant that directly neutralizes free radicals and regenerates other antioxidants like Vitamin C and Vitamin E, reducing oxidative damage to cells and tissues.

Improved Immune Function

- Glutathione supports the immune system by regulating inflammation and enhancing the activity of white blood cells, improving the body's ability to fight infections and diseases.

Liver Protection

- The hepatic glutathione pathway protects liver cells from damage caused by toxins, drugs, and alcohol, reducing the risk of liver diseases such as fatty liver disease, cirrhosis, and hepatitis.

Support for Cellular Energy

- Glutathione aids in mitochondrial function by reducing oxidative stress, ensuring cells can efficiently produce energy.

Anti-Aging Effects

- By reducing oxidative stress and enhancing cellular repair mechanisms, glutathione slows down the aging process and supports skin health, elasticity, and a youthful appearance.

Improved Metabolic Function

- Glutathione supports metabolic pathways, including the proper metabolism of fats, carbohydrates, and proteins, which can improve overall energy levels and weight management.

Neuroprotection

- The antioxidant properties of glutathione protect brain cells from oxidative stress, reducing the risk of neurodegenerative conditions like Alzheimer's and Parkinson's disease.

Enhanced Recovery from Illness or Injury

- Glutathione helps reduce inflammation, repair damaged cells, and accelerate the recovery process following illness, surgery, or injury.

Homocysteine Reduction

- Homocysteine is an amino acid that, when elevated, increases the risk of cardiovascular disease and other health issues.

C-Reactive Protein (CRP) Reduction

- CRP is a marker of inflammation, and elevated levels are associated with chronic diseases such as cardiovascular disease, diabetes, and autoimmune conditions. Glutathione supports lowering CRP levels through antioxidant action, inflammatory pathway modulation, and detoxification.

Supplement Facts

Serving Size : 3 capsules daily
Serving per container: 30

	Amount Per Serving	% Daily Value
L-Glutathione Reduced	600 mg	
Vitamin B-12 (As Methylcobalamin)	5 mg	
Folate (As 5-methyl-tetrahydrofolate)	1 mg	
SAMe (As S-Adenosyl-L- Methionine)	150 mg	
N-Acetyl-L-Cysteine	500 mg	
TMG (Trimethylglycine)	150 mg	
R-Alpha-Lipoic Acid	150 mg	
Vitamin B-6 (As Pyridoxal-5- Phosphate)	150 mg	
Magnesium (As Mg Orotate 7%)	15 mg	
L-Selenomethionine	100 mcg	
Dandelion Leaf Organic	5 mg	
*Daily value not established.		

Other Ingredients: Rice extract from ground Rice Hulls, Veggie Caps.

Hypoallergens: Non-GMO, No Binders, No Toxic Flow Agents, Gluten Free, No Preservatives, No Coloring, No Flavoring, Veggie Caps.

Recommended Dosage

Adults: three capsules per day as instructed by your health provider.

Children: Dosage depends on age, ask health provider.

Suggested Use: To support methylation and HGP.

WARNINGS:

Keep this and all medicines out of the reach of children. In case of accidental overdose, contact physician or Poison Control Center.

As with any drug, if you are pregnant or nursing a baby, seek advice of a health professional before using this product. Do not use if seal is broken or missing.

*These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
