

Kidney Pro

Kidney Pro is designed to support functionality and detoxification of the kidney and urinary tract. Can be used as a solo product or along side Liver Pro, Colon Pro, and Whole Body Immune Pro as a full-body detoxification kit. Many of these herbs and ingredients also have **additional health benefits**, such as improving digestion, balancing blood sugar, and enhancing general detoxification processes in the body.

This combination of herbs works on protocols to support:

- **Increasing urination** to flush out excess fluids and toxins.
- **Reducing inflammation** and oxidative damage in kidney tissues.
- **Supporting circulation** to improve blood flow to the kidneys and enhance their detoxification abilities.
- **Providing antioxidants** that protect kidney cells and promote overall renal health.

Cinnamon (Bark)

- **Anti-inflammatory** and **antioxidant** properties help protect kidney cells from oxidative damage.
- Enhances **blood circulation**, improving kidney function.
- May help **regulate blood sugar**, reducing kidney strain due to high blood sugar (especially important in diabetes-related kidney issues).
- **Detoxification**: Helps in reducing **toxins** in the body, easing kidney workload.

Borage Leaves

- Contains **anti-inflammatory** compounds that may reduce kidney swelling and irritation.
- Known to promote the **excretion of waste** products through the kidneys by increasing urination.
- **Detoxification**: Acts as a natural **diuretic**, flushing out **toxins** and **excess fluids** from the body.

Cedar Leaves

- **Antibacterial** and **antifungal** properties, which help fight infections that may affect the kidneys.
- Contains **anti-inflammatory** compounds that soothe kidney tissues.
- May support overall **renal health** and function by reducing inflammation and oxidative stress.
- **Detoxification**: Can promote **urinary flow**, aiding in the elimination of toxins from the body.

Damiana (Leaf)

- **Diuretic** properties encourage **increased urination**, supporting the elimination of waste and excess fluids.
- Known to support **urinary tract health** and can help with **kidney infections** or **bladder issues**.
- Can help with **kidney detoxification** by flushing out toxins and promoting fluid balance.

Lycii Fructus (Goji Berry)

- Rich in **antioxidants** like **vitamin C** and **beta-carotene**, which protect kidney cells from oxidative damage.
- Supports **renal function** by improving the overall health of the kidneys and enhancing **blood circulation**.
- Known for its ability to **tonify kidney yin** (according to traditional Chinese medicine), improving kidney vitality and function.
- May help in **detoxifying the kidneys** by promoting healthy **blood flow** and reducing kidney inflammation.

Red Raspberry (Leaf)

- Rich in antioxidants and anti-inflammatory properties, which can help protect kidney tissues from damage.
- Astringent properties can support kidney function and help reduce fluid retention.
- **Detoxification**: Acts as a mild diuretic, helping to flush out toxins and excess fluids from the kidneys.

Wild Rose Root

- Known for its detoxifying and anti-inflammatory effects, Wild Rose Root can promote kidney health by reducing inflammation and oxidative stress.
- May support urinary health by promoting the removal of waste from the kidneys and preventing the buildup of toxins.
- **Detoxification**: Acts as a natural diuretic, promoting detoxification by increasing urination and eliminating toxins from the body.

Cloves (Powder)

- Antioxidant and anti-inflammatory properties help reduce kidney oxidative stress and promote overall kidney health.
- Contains eugenol, a compound that has been shown to have protective effects on kidney tissue.
- **Detoxification**: Cloves may help with the removal of toxins and excess waste products from the kidneys by enhancing circulation and promoting kidney function.

Fenugreek

- Support for kidneys:
 - Rich in **fiber**, **antioxidants**, and **anti-inflammatory** compounds that support kidney health and function.
 - Fenugreek seeds are known to help **regulate blood sugar** and reduce kidney strain, particularly in diabetic nephropathy.
 - **Detoxification**: Promotes **detoxification** by supporting **urinary flow** and aiding in the elimination of toxins through the kidneys.

Pygeum Bark

- Known for its ability to promote **prostate health**, which indirectly benefits kidney function (especially in men).
- Contains **anti-inflammatory** compounds that can help reduce **swelling** and **irritation** in the kidneys and surrounding tissues.
- **Detoxification**: Supports **urinary health** and promotes the **removal of waste** through improved renal function.

Holy Basil Powder

- **Anti-inflammatory** and **antioxidant** properties help protect kidney cells and promote **kidney health**.
- Known to support **detoxification** by improving **renal function**, flushing out toxins, and supporting **urinary flow**.
- Reduces **stress** and **oxidative damage**, which may reduce the workload on the kidneys.

Cayenne

- **Stimulates circulation** and improves overall **blood flow**, enhancing kidney function and nutrient delivery to the kidneys.
- **Anti-inflammatory** properties help reduce swelling and inflammation in the kidneys and urinary tract.
- **Detoxification**: Known to promote **detoxification** by encouraging sweating and urination, thereby helping to eliminate **toxins** from the body.
