

Nano Ionic Silica

Dr. Dale's Nano Ionic Silica Formula is a highly concentrated, water-soluble source of silica designed for maximum absorption and cellular utilization. Silica, a vital trace mineral composed of silicon and oxygen, plays a critical role in collagen formation, calcium management, and structural integrity throughout the body. Using advanced nano ionic technology, this formula delivers silica in an ultra-bioavailable form, allowing for rapid absorption and effective support of connective tissues, bones, skin, and the gastrointestinal system.

Supports collagen production for skin, joints, and connective tissue health

- Silica plays a fundamental role in collagen synthesis, helping maintain the structure and elasticity of skin, joints, ligaments, and connective tissues.

Promotes stronger bones and healthy calcium utilization

- Silica helps regulate calcium deposition in the body, supporting proper bone mineralization and contributing to stronger, healthier bones.

Supports joint comfort and mobility

- By aiding collagen formation and connective tissue strength, silica may help reduce stiffness and support flexibility and joint function.

Enhances hair, skin, and nail health

- Silica contributes to keratin and collagen production, helping improve hair strength, skin elasticity, and nail durability.

Supports healthy aging and tissue regeneration

- By promoting structural integrity and cellular repair, silica helps support the body's natural aging processes and tissue renewal.

Supports gastrointestinal tract integrity

- Silica contributes to the health of the digestive lining, helping maintain gut structure and function.

Provides antioxidant and protective support

- Silica helps protect tissues from degeneration and supports overall cellular resilience.

Highly bioavailable for maximum absorption

- The nano ionic, water-soluble form allows for rapid absorption and efficient delivery to cells compared to traditional silica supplements.

Beneficial effects on conditions such as arthritis, osteoporosis, GI tract disorders, and aging-related issues

- By supporting calcium management and collagen production, silica may help reverse or alleviate symptoms associated with these conditions.

Supplement Facts

Serving Size : 30 drops (2ml)

	Amount Per Serving	%DV*
Silica (as silicone dioxide)	375mg	**

*Daily Values not established

Other Ingredients: De-Ionized water.

Recommended Dosage

30 drops per day in 8 oz of juice or purified water.

WARNINGS:

- DO NOT FREEZE.
- Do not use if the tamper-evident seal is broken or missing.
- Keep this and all medication out of the reach of children.
- Do not use if pregnant or nursing unless directed by a physician or healthcare professional.
- Store in a cool, dry place.
