

Nano Ionic Zinc

Dr. Dale's Nano Ionic Zinc is a highly bioavailable, liquid ionic zinc formula designed to support immune function, cellular health, and overall metabolic balance. Using Dr. Dale's proprietary purification process, pure zinc crystals are transformed into angstrom-sized, fully hydrated ionic particles—allowing for rapid absorption and immediate cellular availability.

Strengthens Immune Function

- Zinc plays a critical role in immune cell activity, helping the body respond more effectively to daily immune challenges.

Supports Cellular Repair & Healthy Tissue Formation

- Essential for DNA synthesis, wound healing, and cellular regeneration—helping maintain optimal structural and functional integrity of the body.

Promotes Healthy Skin & Clear Complexion

- Zinc supports skin repair, reduces oxidative stress, and helps maintain balanced oil production.

Enhances Hormonal & Metabolic Balance

- Zinc is vital for reproductive health, hormone synthesis, and metabolic efficiency.

Boosts Cognitive Function & Mood Stability

- Zinc contributes to neurotransmitter balance, supporting memory, focus, and emotional wellbeing.

Supports Antioxidant Activity

- Zinc plays a key role in superoxide dismutase (SOD) production, helping combat free radical damage.

Supports Healthy Kidney Function & Mineral Balance

- Zinc plays a role in maintaining proper mineral metabolism and may help support kidney function by reducing oxidative stress—an important factor in chronic kidney disease (CKD).
- Zinc's antioxidant properties help modulate inflammatory pathways, which may support individuals with chronic kidney challenges.

Promotes Liver Health

- Zinc is essential for numerous liver enzymes involved in detoxification, helping the body break down toxins and metabolic waste more efficiently.
- Zinc contributes to protein synthesis and cell repair, offering support for liver health and helping maintain normal liver structure and function.

Promotes Red Blood Cell Integrity & Growth

- Zinc plays a role in cell division and repair, supporting the body's ability to produce healthy red blood cells.
- Zinc's antioxidant activity helps neutralize free radicals generated during repeated red blood cell breakdown, supporting overall cellular resilience.

Recommended Dosage

Women: 12mg (*During pregnancy and lactation, a woman's requirements for zinc increase.*)

Men: 15mg

WARNINGS:

- Do not use if the tamper-evident seal is broken or missing.
- Keep this and all medication out of the reach of children.
- Do not use if pregnant or nursing unless directed by a physician or healthcare professional.
- Store in a cool, dry place.
