

Vitamin D3-K2/Mk7

Dr. Dale has formulated a new supplement—Vitamin D3-K2/MK7. This powerful formula combines Vitamin D3 and Vitamin K2, two essential nutrients that work in harmony to optimize calcium metabolism, strengthen bones, and support overall vitality. While Vitamin D3 enhances calcium absorption, Vitamin K2 ensures that the calcium is delivered precisely where it belongs — in your bones and teeth — while protecting arteries and soft tissues. Together, they create a synergistic effect that promotes strong structure, mobility, immune resilience, and mental well-being.

Vitamin D3 (Cholecalciferol)

- Supports strong bone structure by enhancing natural calcium absorption.
- Promotes balanced energy levels and vitality for everyday performance.
- Encourages overall resilience by supporting natural cell and tissue functions.
- Contributes to mood balance and mental clarity, helping you feel your best.
- Promotes skeletal integrity and mineral delivery.
- Strengthens immune defenses by regulating immune activity.

Vitamin K2 (Menaquinone)

- Directs calcium to where it belongs, helping maintain flexibility and strength in bones and joints.
- Enhances structural balance, supporting posture, movement, and mobility.
- Works synergistically with Vitamin D3 for optimal mineral utilization.
- Promotes bone density while protecting cardiovascular health.

Supplement Facts

Serving Size : 1 capsule
Serving per container: 60

% Daily Value

Amount per Serving

Vitamin D3 (as Cholecalciferol)	125 mg (5000 IU)
Vitamin K2 (as Menaquinone-7)	100 mcg 150 mg

*Daily value not established.
